

7.2 Functions ↕

□ Watch: Design with functions [27.29 mins]

This video introduces functions in Python, which are a key method of implementing abstraction. We look at the syntax of simple functions and how they are perfect for repetitive tasks. The video introduces more advanced function definitions with parameters and return values.

As you watch, consider the following and make notes in your journal.

- What is syntax of functions with parameters and return values?
- Make a note of the rules of scoping — local versus global variables.
